Model 18x56 Fuel Purifier For Fuel Transfer with Flow Rates of 100 Gallons Per Minute / 378 LPM

The Dieselcraft Fuel Purifier is a simple one step unit that removes 99% of the water and 95 to 98% of heavy particles. Unlike all other products on the market, the Dieselcraft fuel purifier performs its function without the use of a replaceable, changeable or cleanable filter element. This is the ONLY unit with a bed of activated alumina to help remove water and contamination. Removing the contamination immediately before the fuel enters the engine's fuel system, the Dieselcraft Fuel Purifier delivers cleaner fuel, greatly reduces filter clogging by reducing bacterial growth and therefore extending maintenance intervals.

Product	Universal Fuel Purifier
Model	18x56
Maximum Flow	100 GPM, 378 LPM
In and Out couplings	3" inch NPT Forged Steel
Top Port	½ inch NPT
Drain Port	2 inch NPT
Sensor Port	1/8" NPT
Width / Diameter	18 inches, 457 MM
Gross Weight	475 pounds, 215 kilos
Finish	Epoxy Powder Coat Grey Custom colors available
Options	Mounting Strap for Water Sensor Part #MG-49 Water Sensor Part #06-5
