## Model 18x76 Fuel Purifier For Fuel Transfer with Flow Rates of 200 Gallons Per Minute / 756 LPM

The Dieselcraft Fuel Purifier is a simple one step unit that removes 99% of the water and 95 to 98% of heavy particles. Unlike all other products on the market, the Dieselcraft fuel purifier performs its function without the use of a replaceable, changeable or cleanable filter element. This is the ONLY unit with a bed of activated alumina to help remove water and contamination. Removing the contamination immediately before the fuel enters the engine's fuel system, the Dieselcraft Fuel Purifier delivers cleaner fuel, greatly reduces filter clogging by reducing bacterial growth and therefore extending maintenance intervals.

Product	Universal Fuel Purifier
Model	18x76
Maximum Flow	200 GPM, 756 LPM
In and Out couplings	4" inch NPT Forged Steel
Top Port	½ inch NPT
Drain Port	2 inch NPT
Sensor Port	1/8" NPT
Width / Diameter	18 inches, 457 MM
Gross Weight	525 pounds, 239 kilos
Finish	Epoxy Powder Coat Grey Custom colors available
Options	Mounting Strap for Water Sensor Part #MG-49  Water Sensor Part #06-5
