## Model 5x24 Fuel Purifier

**For Stationary Diesel Pumps, Generators and Equipment with Circulation Pumps  
from 4 to 7 GPM and  
Engines from 600 to 1500 Horse Power**

The Dieselcraft Fuel Purifier is a simple one step unit that removes 99% of the water and 95 to 98% of heavy particles. Unlike all other products on the market, the Dieselcraft Fuel Purifier performs its function without the use of a replaceable, changeable or cleanable filter element. This is the ONLY unit with a bed of activated alumina to help remove water and contamination. Removing the contamination immediately before the fuel enters the engine's fuel system, the Dieselcraft Fuel Purifier delivers cleaner fuel, greatly reduces filter clogging by reducing bacterial growth and therefore extending maintenance intervals.

Product	Universal Fuel Purifier
Model	5x24
Maximum Flow	7 GPM, 26 LPM
In and Out couplings	1 inch NPT Forged Steel
Top Port	½ inch NPT
Drain Port	½ inch NPT
Sensor Port	1/8 inch NPT
Width / Diameter	5 inches, 127 MM
Gross Weight	18 pounds, 8.1kilos
Finish	Epoxy Powder Coat Grey Custom colors available
Options	Mounting Strap Part #MG-03 Mounting Strap for Water Sensor Part #MG-49 Tripod leg assembly Part # MG-44 Water Sensor Part #06-5

Legs are optional
