Model 8x20 Fuel Purifier

For Stationary Diesel Pumps, Gen Sets, Locomotives, Fuel Docks and Equipment with Engines from 1200 to 2000 Horse Power

The Dieselcraft Fuel Purifier is a simple one step unit that removes 99% of the water and 95 to 98% of heavy particles. Unlike all other products on the market, the Dieselcraft Fuel Purifier performs its function without the use of a replaceable, changeable or cleanable filter element. This is the ONLY unit with a bed of activated alumina to help remove water and contamination. Removing the contamination immediately before the fuel enters the engine's fuel system, the fuel purifier delivers cleaner fuel, greatly reduces filter clogging by reducing bacterial growth and therefore extending maintenance intervals.

Product	Universal Fuel Purifier
Model	8x20
Maximum Flow	20 GPM, 76 LPM
In and Out couplings	2 inch NPT Forged Steel
Top Port	1 inch NPT
Sensor Port	1/8 NPT
Width / Diameter	8 inches, 203 MM
Gross Weight	40 pounds, 18 kilos
Finish	Epoxy Powder Coat Grey * Custom Colors Available
Options	Mounting Strap Part #MG-16-8 Mounting Strap for Water Sensor Part # MG-49-8 Tripod Leg Assembly Part #MG-44-8 Water Sensor Part #06-5
